

CHRISTCHURCH

Dear Christ Church,

Thank you all for continuing to pray for Christine! As we mentioned in the last update, her brain surgery yesterday went well. It included two separate procedures to remove two different fluids. Both of those procedures were successful and the CAT scan from this morning showed no signs of the fluids returning. This is something the doctors are monitoring on an ongoing basis; Christine's vital signs are stable.

Lord, thank you for hearing our prayers.

Please keep praying. It is still what is needed the most, and will be for the next few days.

Here are some specific prayer requests:

- **PRAY** against all bleeding as that increases the potential for clots, and therefore increases the potential for a stroke.
- **PRAY** for Christine's carotid artery to be made whole.
- **PRAY** for Christine's peace of soul. While occasionally she displays consciousness, we don't know if she's aware of events or her current location. Pray against any distress or panic Christine may feel.
- **PRAY** for Brendan, Cormac, Skye, and Bronwyn. There is a sweet unity between the four of them. Pray for them as they navigate this moment by moment.

Anyone is welcome to come to tonight's prayer service! We hope to see you at the Hope in the City sanctuary at 7pm (4007 Monterey Oaks Blvd., 78749). We are printing all the messages you're sending to the designated email address, care@christchurchofaustin.org, and giving them to Cliff. He is reading them and is humbled by the outpouring of affection, support and prayer.

We plan to update you at least each afternoon over the next few days. For anyone wanting to access previous updates or begin receiving updates, please visit the bottom of the Christ Church [homepage](#). Please direct general questions to meghan@christchurchofaustin.org. For pastoral concerns, please reach out to matt@christchurchofaustin.org.
